- Reporting period: 2026-08-23 to 2026-08-31
- As of: 2026-08-31

Three things to know

- Yucatán Official Gazette No. 36,055 lists a notice granting deadlines for public consultations: The publication confirms that a public-consultation notice exists in the issue, but the supplied extract is insufficient to determine its subject, applicable parties, deadlines, operational implications, or relevance to maritime and D&D activity. Source: yucatan.gob.mx
- CBP publishes final rule for ACE electronic export manifests for rail cargo: The source indicates a regulatory change affecting the ACE electronic export-manifest framework for rail cargo. The supplied content does not provide enough operational detail to determine specific workflow, cost, timing, or compliance impacts for individual parties. Source: federalregister.gov
- CBP Establishes Four Customs-Enforcement Areas in U.S. Near-Shore Waters: Vessels operating in or near the designated areas may face heightened CBP boarding, examination, port-entry, seizure, or arrest activity under the authorities described in the document. Source: federalregister.gov

Top action

Retrieve and review page 6 and the full public-consultation notice.

Executive summary

The supplied evidence indicates heightened customs-enforcement exposure in four U.S. near-shore regions and a U.S. ACE rail-export-manifest rule effective 26 October 2026. A Yucatán Official Gazette entry confirms a public-consultation notice, but its substance is unavailable. A Honolulu safety-zone rule was time-limited through 25 August 2026; the supplied extract does not establish broader operational effects.

All new findings

1. Yucatán Official Gazette No. 36,055 lists a notice granting deadlines for public consultations

- Priority: 100/100 (high)
- Publisher: yucatan.gob.mx
- Published: 2026-08-28
- Region / lane: mexico / mexico

THREE KEY POINTS

- The issue is dated 28 August 2026 and is published by the Government of Yucatán.
- The table of contents lists a Sustainability Secretariat notice granting deadlines for public consultations.
- The supplied extract does not provide the consultation subjects, deadlines, procedures, or maritime and D&D impacts.

What changed: The Government of Yucatán published Official Gazette issue No. 36,055. Its contents list, under the Secretariat of Sustainable Development, a notice titled "SE OTORGAN PLAZOS PARA CONSULTAS PÚBLICAS," along with transparency and judicial materials. The supplied content does not include the body of that notice.

Why SheperD cares: The publication confirms that a public-consultation notice exists in the issue, but the supplied extract is insufficient to determine its subject, applicable parties, deadlines, operational implications, or relevance to maritime and D&D activity.

Recommended action: Retrieve and review page 6 and the full public-consultation notice.

Limitations: Only the supplied source content was used; no outside knowledge or independent source was consulted.; The source is a PDF, but the supplied extract does not include the full text of the page 6 notice.; The exact consultation deadlines and any legal or operational requirements cannot be determined from the extract provided; this is not legal advice.

SOURCE yucatan.gob.mx

2. CBP publishes final rule for ACE electronic export manifests for rail cargo

- Priority: 100/100 (high)
- Publisher: federalregister.gov
- Published: 2026-08-26
- Region / lane: us / regulatory

THREE KEY POINTS

- CBP's final rule concerns ACE electronic export manifests for rail cargo.
- The source lists October 26, 2026, as the effective date.
- The document includes amendments to Parts 103, 123, and 192.

What changed: The supplied Federal Register content identifies an August 26, 2026, final rule titled "Automated Commercial Environment (ACE) Electronic Export Manifest for Rail Cargo," issued by the Department of Homeland Security's U.S. Customs and Border Protection. It lists an effective date of October 26, 2026, and includes amendments to specified regulatory parts.

Why SheperD cares: The source indicates a regulatory change affecting the ACE electronic export-manifest framework for rail cargo. The supplied content does not provide enough operational detail to determine specific workflow, cost, timing, or compliance impacts for individual parties.

Recommended action: Review the complete Federal Register rule and the linked official PDF.

Limitations: Analysis is based only on the supplied Federal Register page content; no outside sources were used.; The supplied content is an excerpt and does not include the full rule text, detailed requirements, cost analysis, or implementation instructions.; The source states that the FederalRegister.gov XML rendition is an unofficial informational resource until the Administrative Committee of the Federal Register issues a regulation granting it official legal status; the linked official PDF was not independently reviewed here.

3. CBP Establishes Four Customs-Enforcement Areas in U.S. Near-Shore Waters

- Priority: 100/100 (high)
- Publisher: federalregister.gov
- Published: 2026-08-25
- Region / lane: us / regulatory

THREE KEY POINTS

- Four enforcement areas cover near-shore waters in South Florida, Central/Southern California, Puerto Rico, and the Gulf Coast of Texas.
- CBP states the areas are intended to support interdiction of vessels used for smuggling illegal cargoes.
- Within the areas, CBP may board, examine, bring vessels into port, pursue, seize, and arrest under applicable law.

What changed: The Commissioner of U.S. Customs and Border Protection declared four Customs-Enforcement Areas and described the enforcement authorities available to customs officers and agents within them.

Why SheperD cares: Vessels operating in or near the designated areas may face heightened CBP boarding, examination, port-entry, seizure, or arrest activity under the authorities described in the document.

Recommended action: Obtain and review the complete Federal Register document and its referenced PDF for the precise boundaries and any additional provisions.

Risk: The source documents an expanded or specifically designated enforcement framework that can increase operational and compliance exposure for vessels operating within the four areas.

Limitations: Only the supplied Federal Register page extract was used; no outside source or independent corroboration was consulted.; The extract omits the complete text, including the detailed geographic descriptions and boundaries of the four Customs-Enforcement Areas.; The source page identifies itself as an unofficial informational prototype pending official legal status from the Administrative Committee of the Federal Register; the supplied material does not provide a separate effective date or implementation schedule.

4. Coast Guard Publishes Safety-Zone Rule for T/V DENISE FOSS in Honolulu

- Priority: 100/100 (high)
- Publisher: federalregister.gov
- Published: 2026-08-24
- Region / lane: us / regulatory

THREE KEY POINTS

- A Coast Guard rule concerns a safety zone for T/V DENISE FOSS in Honolulu.
- The rule is effective from August 24, 2026 through 9 a.m. on August 25, 2026.
- Actual-notice enforcement applies from 6 a.m. on August 19, 2026 until August 24, 2026.

What changed: The Department of Homeland Security, through the Coast Guard, published a Federal Register rule titled "Safety Zone; T/V DENISE FOSS (O.N. 1254223), Honolulu, HI." The supplied source identifies the effective period and an earlier actual-notice enforcement period.

Why SheperD cares: The rule signals a temporary, formally published safety-zone measure affecting activity associated with the named vessel and Honolulu location during the stated period. The supplied excerpt does not provide the zone's geographic boundaries, operating restrictions, or exceptions.

Recommended action: Review the complete Federal Register rule and linked official PDF for geographic boundaries and operative restrictions.

Limitations: Only one supplied public source was provided; no independent corroborating source was supplied.; The supplied content is an excerpt and does not include the complete operative rule text.; Geographic boundaries, coordinates, restricted conduct, exemptions, authorization procedures, and enforcement consequences are unavailable in the supplied content, creating an access gap for operational assessment.

Watchlist

- None.

Background context

These articles remain useful context but do not count as current-week evidence.

- None.

Limitations

- Evidence is limited to the supplied summaries, extracts, and claims; no independent corroboration was provided.
- The CBP Customs-Enforcement Area boundaries and implementation details are not included in the supplied extract.
- The ACE rule's detailed data elements, applicability, and workflow impacts are not included.
- The Yucatán consultation notice's substantive text and deadlines are not included.
- The Honolulu safety-zone coordinates, restrictions, exceptions, and any actual disruption are not included.
